***Election/Restriction***

Applicant's election with traverse of claims 34-45 in Paper No. 11 is acknowledged. The traversal is on the ground(s) that claim 40 includes the subject matter of the limitation of claim 40 and claims 40 and 46 do not define separate species. This is not found persuasive because claim 34 is a method for removing the metal layer with dispensing nozzle and claim 46 is the method of controlling the apparatus.

Since, applicants admit that claims 40 and 46 do not define separate species. And, applicants intentional include two species in the elected species that is non-responsive as set forth in the restriction requirement, hence, claim 40 is treated as non-elected species by the examiner.

Claims 40 and 46-54 withdrawn from further consideration pursuant to 37 CFR 1.142(b), as being drawn to a nonelected with traverse, there being no allowable generic or linking claim. Applicant timely traversed the restriction (election) requirement in Paper No. 12.

The requirement is still deemed proper and is therefore made FINAL.

***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. § 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Art Unit: 2812

Claims 34-39 and 41-45 are rejected under 35 U.S.C. § 102(e) as being anticipated by Wang 6,447,668.

Wang discloses a method of removing a metal layer from a substrate which includes :  
rotating a substrate, fig. 22B+ and col. 33, lines 19+,  
positioning a cathode fluid dispensing nozzle 510, 503 over a central portion of the substrate,  
applying an electric bias between the substrate and the cathode fluid dispensing nozzle.  
see col. 33, lines 40+.

***Information Disclosure Statement***

The information disclosure statement filed Jan. 8, 2002 fails to comply with 37 CFR 1.98(a)(2), which requires a legible copy of each U.S. and foreign patent; each publication or that portion which caused it to be listed; and all other information or that portion which caused it to be listed. It has been placed in the application file, but the information referred to therein has not been considered. Applicants only submitted first listed reference Reid et al. 6,162,344.
